ABOUT ME

Enthusiastic Product Manager with a background in cybersecurity and software development. Experienced in managing integrations, driving product roadmaps, and collaborating cross-functionally to deliver impactful solutions. Adept at bridging the gap between technical teams and business needs to optimize product value.

EDUCATION

Secondary and Higher Secondary Education

St. Teresa School, 2017 – 2020 | Ghaziabad, India
10th Boards: 95.6% 12th Boards: 94.5%

Bachelor of Technology

NIIT University, 2020 – 2024 | Neemrana, India
CGPA: 9.63

SKILLS

Product Management Roadmap Planning | Stakeholder Communication | Product Prioritization | User Research | Market Analysis

Programming & Technical Skills Python | JavaScript | Django | MERN Stack | SQL | Selenium

Tools & Platforms Jira | Aha | Monday | Adobe Suite | Figma | Canva | Power BI | Selenium | Agile Methodologies

Security Expertise Cryptography | Ethical Hacking | Network Security | Information Security

EXPERIENCE

IBM, Associate Product Manager

Sep 2024 – Mar 2025

- **Spearheaded QRadar SIEM integrations**, driving end-to-end execution from requirement gathering to delivery.
- Led **end-to-end integration lifecycle**—from customer requirement analysis to roadmap prioritization—ensuring seamless SIEM compatibility for enterprise security teams.
- Strengthened **cross-functional collaboration**, working closely with developers, product architects, and external vendors to streamline integration processes and reduce blockers.
- Drove **\$12.7M+ in revenue impact** by delivering high-priority security integrations, enhancing SIEM capabilities for enterprise customers.

IBM, Associate Product Manager Intern

Jan 2024 – Aug 2024

- **Led integrations** for **QRadar SIEM**, delivering new features and Integrations updates.
- Conducted **market research** and **competitor analysis** to guide product strategy.
- Acted as a bridge between customers and engineering to **resolve technical gaps**.

PROJECTS

Integrations Framework

Designed and implemented the I.N.T.E.G.R.A.T.E. Framework to streamline QRadar SIEM integrations, reducing bottlenecks in a backlog of 500+ items. Established structured workflows, optimized partner collaboration, and introduced agile methodologies to accelerate integration delivery while enhancing transparency and responsiveness.

ESA Automation

Built a Django-based tool to automate ESA contract management, reducing manual validation from days to hours by extracting, comparing, and categorizing part codes.

CoffeeChain: Blockchain Logistics

Developed a blockchain-based solution to enhance transparency and traceability in the coffee supply chain using smart contracts and decentralized ledger technology.

RESPONSIBILTIES

siNUsoid, Digital Design Team Core

Jun 2022 – Dec 2022

Led the team and managed all digital design, from social media to banners, ensuring cohesive visual communication.
